

CALL FOR SPONSOR

The Organizing Committee warmly invites companies, research institutions, and industry leaders to partner with us as sponsors for the ISRM 2026. We expected to attract over 200 international experts and participants, offering an exceptional opportunity for sponsors to showcase their technologies, products, and innovations to a highly specialized global audience in robotics and mechatronics.

ISRM is a prestigious international symposium under the umbrella of the International Federation for the Promotion of Mechanism and Machine Science (IFTOMM), bringing together leading researchers, engineers, industry experts, and students working in robotics, mechatronics, and intelligent systems. The conference provides a unique forum for presenting cutting-edge research, exchanging ideas, and fostering international collaboration in advanced robotic technologies.
